Grates longer than 1500mm supplied in sections. Tile Inserts longer than 1200mm supplied in sections. Channels over

3000mm supplied in sections with joiner. +/-2mm tolerance on

38PS40

Linear Drain

A 38mm wide UPVC channel is connected via downpipes at 200mm intervals to sockets in a 90mm or 100mm drain below. This allows the channel to be installed level while the drainpipe is given sufficient fall to be self-cleaning.

Please be aware that depending on the installation environment, for a pool installation or close to a surf beach, you may need to have your stainless steel grates electropolished.

This unique drainage system was recognised for its innovation by a DesignMark at the Australian International Design Awards.
